

# MOLD REMEDIATION

## ELIMINATE AND PREVENT MOLD AND MILDEW WITH NO BLEACH OR HARMFUL CHEMICALS

Concrobium Mold Control products work on hard and soft surfaces such as drywall, wood, plastic, concrete, siding, shingles, metal, brick, stone, tile, grout, fabric (sports bags, clothing), furniture, flooring, rubber and more.

### PROPER WAY TO REMOVE MOLD

#### PROTECT & ASSESS THE SITUATION

Wear proper PPE such as goggles, proper facemask, gloves and sturdy footwear.\* Assess the extent of the mold and damage

#### REBUILD

damaged areas as required

#### PROTECT

against future mold growth by apply a preventive layer of Concrobium Mold Control to vulnerable areas

#### ISOLATE

the impacted area so mold spores and contamination won't spread and discard damaged materials that are porous such as carpeting, subflooring, wall board and more

#### DRY

the impacted areas thoroughly by using fans, air movers and dehumidifiers and treat remaining building materials with Concrobium Mold Control products.

\*Please refer to the product label for specific PPE recommendations
